# Consistency review

Plot filter: at least 0.1% relative change in an income share.

Small corrections remain in the detail CSV. This filter does not change the data or diagnostic results.

1338 distributions checked

Missing averages / thresholds: 0 / 0

Largest headline−share change: 4.58e−06 % relative

Cases reaching the plot filter: 0

**No plots: headline−share changes and remaining numerical discrepancies are below the display threshold.**

| Country | Years | Concepts | Cases | Mean decline (%) | Threshold gap (%) |
|---|---|---|---|---|---|
| ARG | 2003, 2007 | nat/pod | 3 | 2.36e−11 | 9.97e−10 |
| BRA | 2000−04, 2007−17, 2019 | nat | 17 | 5.91e−12 | 1.34e−12 |
| CRI | 2016, 2021 | nat/pod | 4 | 1.74e−11 | 1.07e−09 |
| ECU | 2010, 2012 | pod | 2 | 1.09e−11 | 8.5e−10 |
| PER | 2003 | nat/pod | 2 | 1.64e−11 | 1.04e−09 |

Mean decline is relative to adjacent incomes. Threshold gap is measured against the overall income mean.

Tiny ordering and equality findings remain recorded; they are not treated as large distributional changes.

Concepts: nat = pretax; pod = disposable. Exact cases and correction reasons: details.csv.
