Consistency review

Plot filter: at least 0.1% relative change in an income share.

Small corrections remain in the detail CSV. This filter does not change the data or diagnostic results.

1338 distributions checked

Missing averages / thresholds: 0 / 0

Largest headline−share change: 9.09e−05 % relative

Cases reaching the plot filter: 0

No unresolved consistency findings. All headline−share changes are below the plot filter.

Country	Years	Concepts	Cases	Mean decline (%)	Threshold gap (%)

No unresolved cases.

Mean decline is relative to adjacent incomes. Threshold gap is measured against the overall income mean.

All checked distributions pass the consistency audit; the detail CSV records the applied corrections.

Concepts: nat = pretax; pod = disposable. Exact cases and correction reasons: details.csv.
