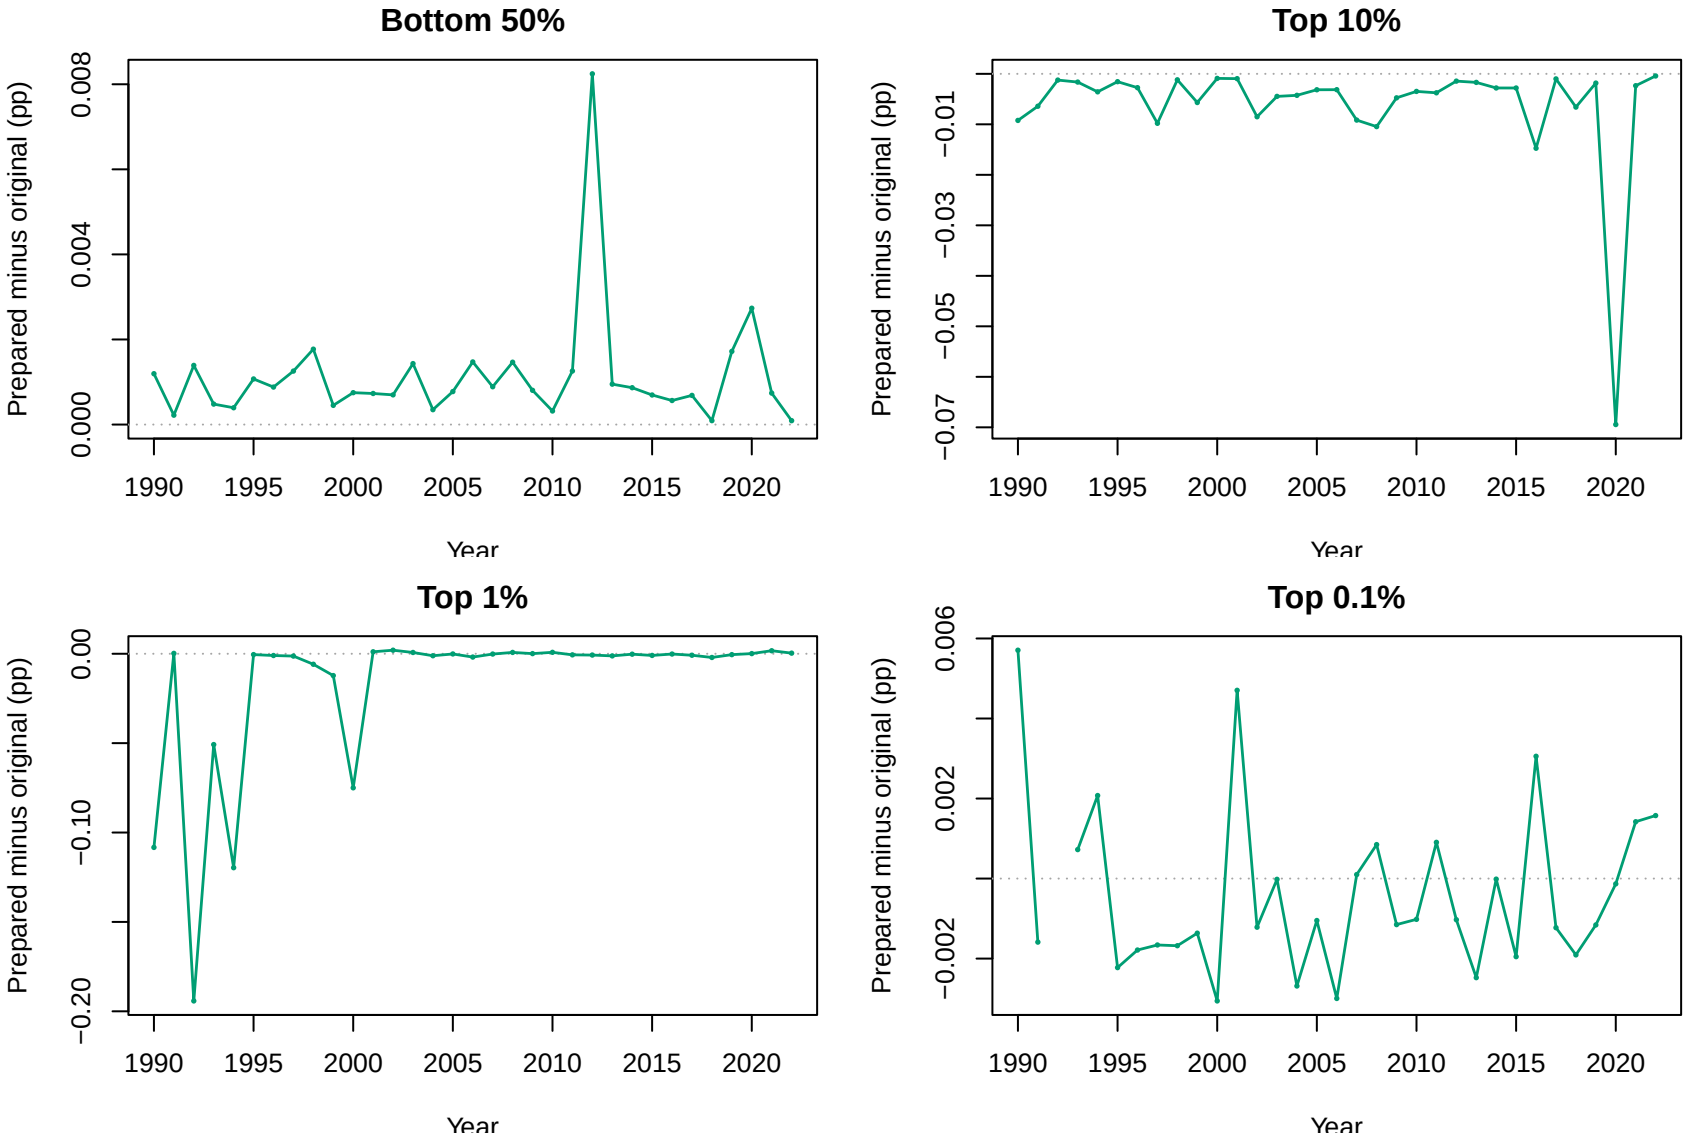
ECU nat esn − source preparation and four−group continuation

Groups: p0−50 | p50−90 | p90−99 | p99−100. Vertical line: 2022 join.
Labelled source boundaries may differ from exact population boundaries; preparation differences are on page 2.

ECU nat esn − preparation differences



Prepared source at exact population groups minus cumulative shares at the original labelled boundaries.
Differences include recovered population weights and regridding, not just income corrections. Missing boundaries are not interpolated.
